

5.5 Cool Slide® and cold curtain operation

Cool Slide® operation:

Note the sticker on the Cool Slide dividing wall.
Further functional and operating instructions at www.kiesling.de/filme

Cool Slide® System: Bedienungsanleitung - Manual		
<p>Geschlossene Position Closed position</p>  <p>Magnetverschlüsse! Anordnung der Elemente einhalten! Keep the right order for working of magnetic locks</p>	<p>Cool Slide verschieben Moving the Cool Slide</p>  <p>Ziehen an den roten Griffen. Pull the red knobs to move.</p>	<p>Schlitten verschieben Moving the sliding unit</p>  <p>Ziehen an den blauen Griffen um den Schlitten zu bewegen. Verschieben der Cool Slide bis auf 800 mm an Verdampfer. Pull the blue knobs to move the sliding unit and move the Cool Slide up to 800 mm to evaporator.</p>

The Cool Slide® wall is only suitable for use with packaged goods.

Further alternative cold retention systems are installed in Kiesling cooling superstructures, for example:

Cold curtain:

PVC cold curtains are used exclusively to reduce the entry of warm air during door openings. The cold curtain must be opened for unloading and immediately closed again afterwards.
Only the loss of cold can be reduced.

PVC cold curtains are only suitable for use with packed goods.
